

DCA in common medicaments

Chemical name:**3 α ,12 α -Dihydroxy-5 β -cholan-24acid**

DCA can be found in the following legal drugs as an additive, therefore in only small amounts. In choloretics DCA is a major constituent, but with a totally different purpose. The role of DCA in our immune system is not recognized or even known from the conservative side of medicine yet. The medicaments below illustrate pretty well the harmfulness and practical medical usage of DCA, even if it's main function is not respected till now.

1. ESSENTIALE N

- Drug company: A. Nattermann & Cie. GmbH, Köln – Cassella Med
- Web: www.cassella-med.de
- PZN: 3695304
